## **MAYO LAKE MINERALS EXTENDS CLOSING OF FINANCING TO APRIL 30, 2019**

**Mayo Lake Minerals Inc. (Mayo Lake) is pleased to announce the extension of its subscription receipt (Sub-Receipt) financing package to raise a minimum of \$1.0 million and a maximum of \$2.1 million in support of an application for a listing on the Canadian Securities Exchange by way of a Non-Offering Prospectus to April 30, 2019 or such other date as Mayo Lake should determine.**

**The Financing Package.** The offering will consist of two Sub-Receipt financings consisting of:

- (1) a common share Sub-Receipt unit (CS Unit) financing at \$0.10 per CS Unit, each CS Unit consisting of one common share and one whole warrant exercisable into one common share for a period of two years from closing at an exercise price of \$0.15 per warrant; and
- (2) a flow through share Sub-Receipt unit (FT Unit) financing at \$0.12 per FT unit, each FT Unit consisting of one FT share and one whole warrant exercisable into one common share for a period of two years at an exercise price of \$0.15 per warrant.

The funds will be utilized for exploration, including drilling of the Anderson-Davidson Property, along with trenching at the Trail-Minto and Carlin-Roop properties, working capital and corollary matters necessary to qualify for a public listing.

**Mayo Lake's Yukon Properties and Exploration Plans.** Mayo Lake's five claim groups cover 231 square kilometres of an under-explored part of the Tombstone Plutonic Belt within the Yukon's Tintina Gold Province. The ever-expanding mining camps within the Tombstone Belt point to the excellent mineral potential of Mayo Lake's properties in general; well supported by the Company's exploration results to date. All of Mayo Lake's properties show high potential for meaningful gold and silver mineralization.

In 2018 Newmont completed 8,000 metres of drilling at the Newmont-Goldstrike Plateau Project to delineate and expand gold mineralization within the Yellow Giant Trend, a rapidly developing district-scale mineral trend in the Mayo Mining District. Mayo Lake's exploration to date, in concert with numerous gold placer operations on its flagship Anderson-Davidson Property, support the fact that Anderson-Davidson covers the northern extension of the Yellow Giant Trend.

The intrusion-related Eagle Gold Deposit where Victoria Gold is putting a mine into production provides a model for exploration on the Company's Trail-Minto Property. Keno Hill silver mines (Alexco) offer models for the silver mineralization detected at Carlin-Roop, which is located at the eastern end of the Keno Hill mining camp.

Upon completion of this financing, Mayo Lake plans to complete between 1200 and 2200 metres of diamond drilling (first ever) on Anderson-Davidson. In addition, a minimum of 1500m of trenching and possibly some drilling on Carlin-Roop and Trail-Minto is anticipated.

Dr. Vern Rampton, P.Eng., President and CEO of Mayo Lake commented "We are still confident that with an anticipated positive market for gold and related junior gold explorers, we will be able to raise the needed funds to obtain a public listing and aggressively explore our highly prospective properties as previously indicated. We are anticipating exciting results from this summer's exploration program."
